

UBK46

Self-holding system for open position

UBK46P____ Self holding kit mounting instructions

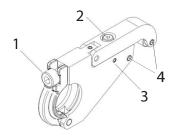

Components

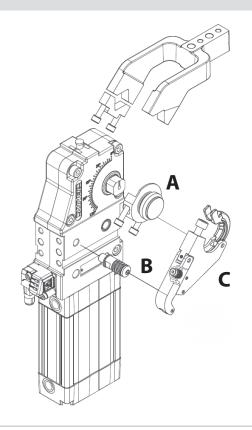

Group (A) Dowel + screws + washers

Group (B) Pin + washers

Gruppo (C) Self holding

Sequence

Mount the arm using the fixing block (A). Tighten the screws with an allen wrench (see suitable torque below)

| Screw | Tightening torque | |
|-------|-------------------|----------|
| | Min [Nm] | Max [Nm] |
| M5 | 9 | 11 |
| M6 | 16 | 18 |
| M8 | 25 | 30 |
| M10 | 33 | 35 |

A

Mount self-holding group (C) on the fixing block (A) without completely loose the nut (1). Screw in the pin group (B) on the housing (see suitable torque below)

| Screw | Tightening torque |
|-------|-------------------|
| M6 | 8 Nm |
| M10 | 25Nm |
| M12 | 45Nm |

Adjust the opening angle of the power clamp unit to the desired position.

In open position:

Lock the self-holding system (C) to the pin (B) Tighten the tightening screw (1) while keeping the self-holding system (C) slightly up and the rollers (4) leaning onto the pin group spring (B)

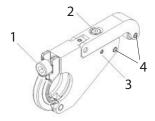

- torque wrench, 25 Nm

Firmly lock the self-holding system (C) over the pin (B) Adjust the holding force screw (2) until the applied load is held properly.

- Allen wrench N°3

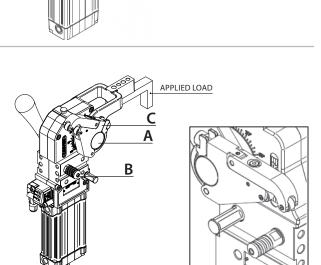

Tighten the safety nut (3)

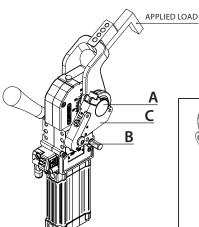

- Allen wrench N°2

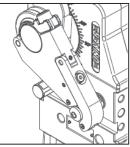

check that the applied load is still held properly. If not, adjust the holding force screw (2) again or replace the pin group (B) + washer (pin group is suggested to be kept on stock as spare part since it is subject to wear).

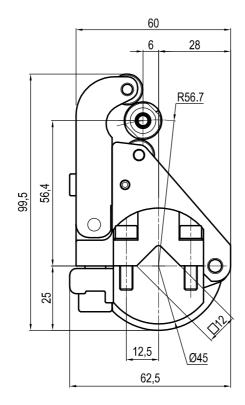

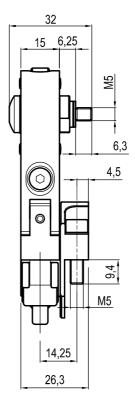

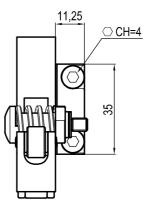

UBK46P12

□12 mm self holding

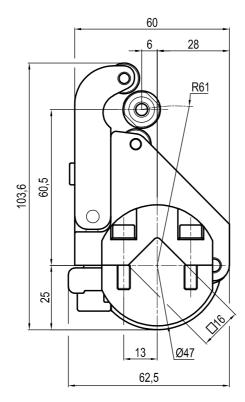

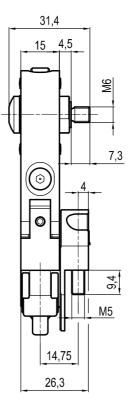

| Clamp size | Material | Weight |
|------------|-------------------|----------|
| 32 | Aluminium / Steel | 0.275 Kg |

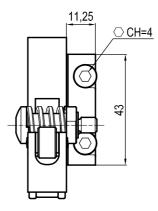

□16 mm self holding

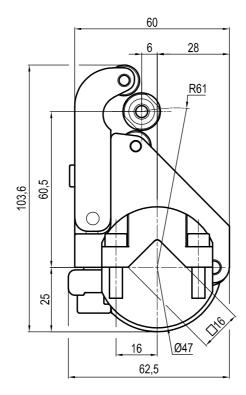

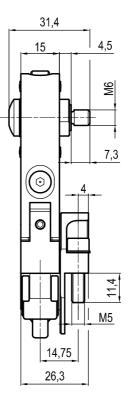

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 40 | Aluminium / Steel | 0.3 Kg |

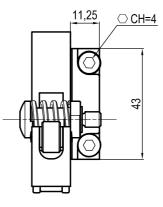

□16 mm self holding

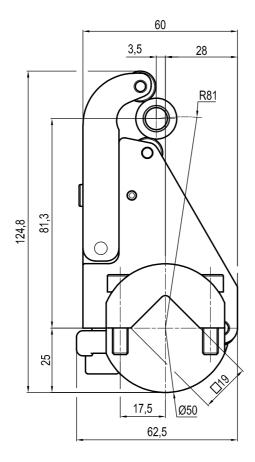

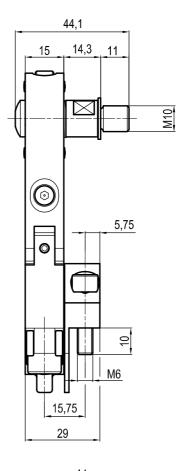

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 40 | Aluminium / Steel | 0.3 Kg |

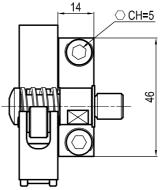

UBK46P19

□19 mm self holding

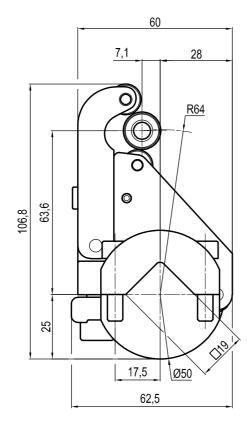

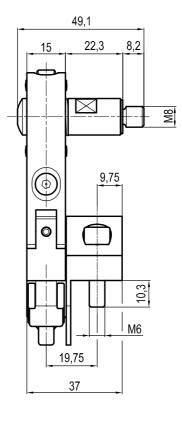

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 50/63 | Aluminium / Steel | 0.4 Kg |

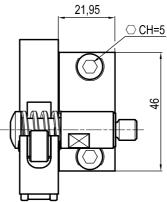

□19 mm self holding

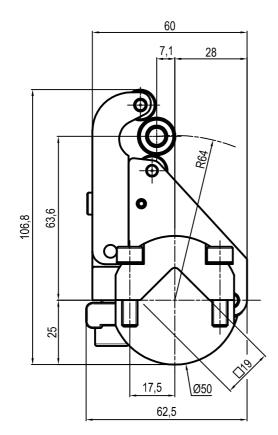

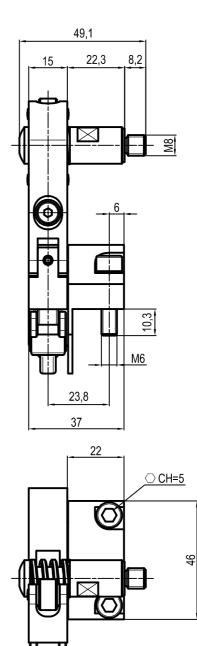

| Clamp size | Material | Weight |
|------------|-------------------|---------|
| 50 | Aluminium / Steel | 0.45 Kg |

□19 mm self holding

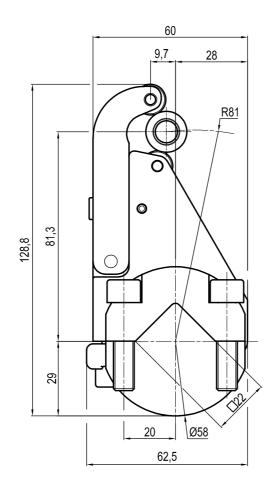

| Clamp size | Material | Weight |
|------------|-------------------|---------|
| 50 | Aluminium / Steel | 0.45 Kg |

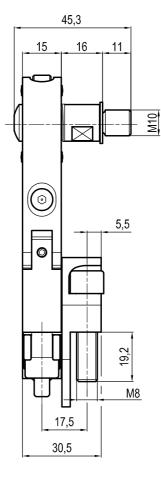

Subject to technical modification without notice.

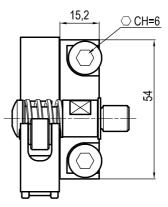

UBK46P22

□22 mm self holding

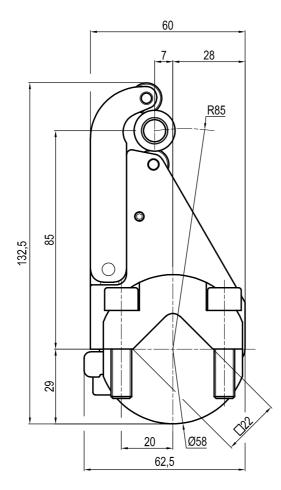

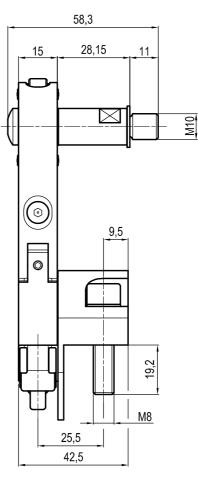

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 63 | Aluminium / Steel | 0.5 Kg |

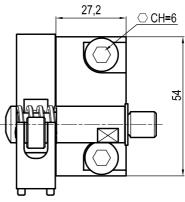

UBK46P22N

□22 mm self holding

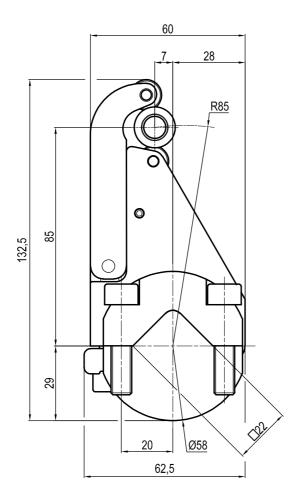

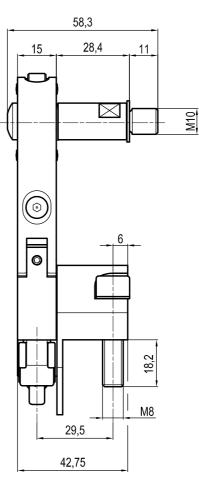

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 63 | Aluminium / Steel | 0.6 Kg |

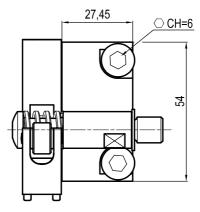

UBK46P22ND

□22 mm self holding

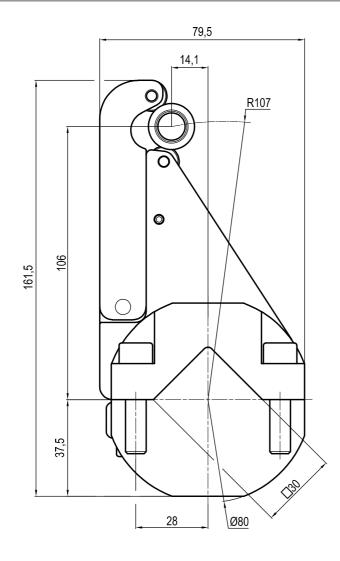

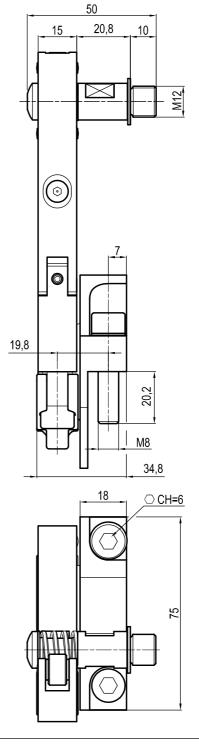

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 63 | Aluminium / Steel | 0.6 Kg |

UBK46P30

□30 mm self holding

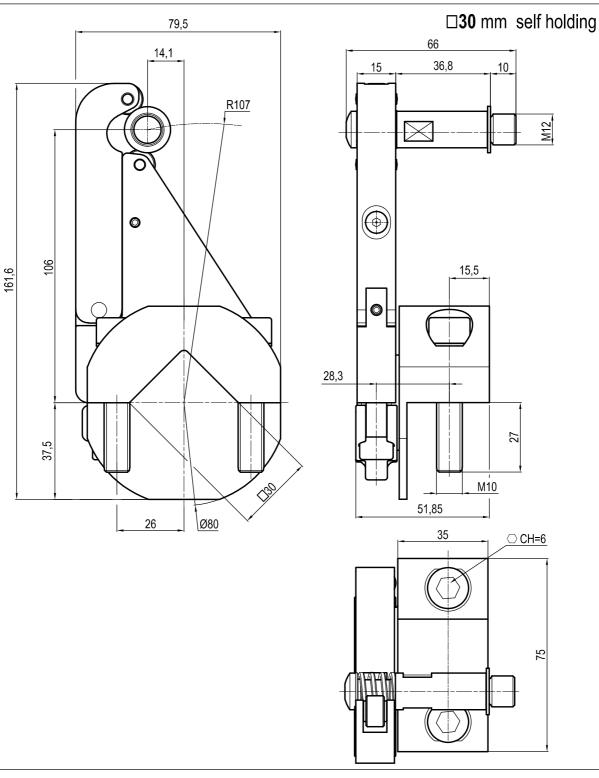

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 80 | Aluminium / Steel | 0.85Kg |

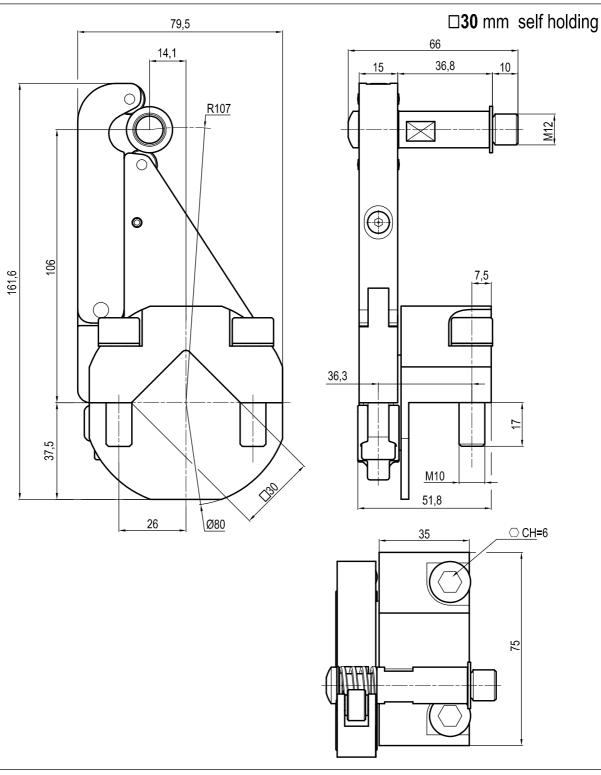

UBK46P30N

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 80 | Aluminium / Steel | 1Kg |

UBK46P30ND

| Clamp size | Material | Weight |
|------------|-------------------|--------|
| 80 | Aluminium / Steel | 1Kg |
